The National Museum in Warsaw, originally founded in 1862 as the Museum of Fine Arts, is currently one of the oldest art museums in Poland. Its collection numbers around 830,000 works of art from Poland and abroad, from ancient times to the present, including paintings, sculptures, drawings, prints, photographs, coins, as well as utilitarian objects and design and enamel collections range from Asian to European decorative artefacts.

We are currently accepting abstracts for oral presentations and posters. Contributions may cover all aspects of the conservation, history, technology and science of enamels on metal. Conference language will be English. The meeting will consist of 2 days of oral presentations and visits to collections. Posters will be exhibited during the length of the meeting and a time allocated for a short (5 minutes) presentation of each poster.
